CAREER OBJECTIVE

Dedicated and detail-oriented Computer Science and Engineering undergraduate with a strong focus on full-stack web development, component-driven architecture, and REST API integration. Experienced in building and deploying web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Adept at translating UI/UX requirements into responsive, high-performance interfaces and ensuring seamless functionality across the development lifecycle. Seeking a challenging role as a Web Developer where I can apply my knowledge of modern JavaScript frameworks, backend integration, and end-to-end application development to contribute to real-world product delivery. Continuously exploring scalable web practices and performance optimization to enhance user experience and system efficiency.

EDUCATION

American International University-Bangladesh (AIUB) <i>Bachelor of Science in Computer Science & Engineering (BSc. in CSE)</i> CGPA: 3.60/4.00	2022 – Present <i>Dhaka, Bangladesh</i>
Gazipur Cantonment College <i>Higher Secondary School Certificate (Science Group)</i> GPA: 5.00/5.00	2021 <i>Gazipur, Dhaka, Bangladesh</i>
Rani Bilashmoni Govt Boys High School <i>Secondary School Certificate (Science Group)</i> GPA: 5.00/5.00	2019 <i>Gazipur, Dhaka, Bangladesh</i>

TECHNICAL SKILLS

Programming Languages: JavaScript, Java, C#, C++, PHP, Python
Frameworks: ASP.NET Core MVC, ReactJS, NextJS, NodeJS, ExpressJS
Databases: Microsoft SQL Server, MySQL, MongoDB
Development & Deployment Tools: Git, GitHub, Postman, VS Code, Visual Studio, Vercel (CI/CD)
Auth & Security: JWT Authentication, OAuth 2.0, Cookie-based Authentication
Other Tools: MS Office, Apache, Canva

TECHNICAL PROJECTS

RecipeHub — Full-Stack Recipe Sharing Platform <i>Next.js, Tailwind CSS, Shadcn UI, Better Auth, MongoDB, Node.js, Express.js, Stripe, JWT</i>	Live Link	Client	Server
- Built and deployed a full-stack recipe sharing platform where users can discover, search, filter, create, update, and manage recipes with a responsive and modern user interface. - Implemented secure authentication using Better Auth with Google OAuth and email/password login, JWT-based authorization, protected routes, and role-based access control for users and administrators. - Developed interactive features including recipe likes, favorites, reporting, premium membership, premium recipe purchasing, and Stripe payment integration with transaction tracking. - Designed a comprehensive admin dashboard to manage users, recipes, featured recipes, reports, premium members, and payment transactions with real-time analytics. - Built reusable React components using Next.js App Router, Tailwind CSS, and Shadcn UI, integrated MongoDB Atlas for data persistence, and deployed the frontend on Vercel and backend on Render.			
DriveFleet — Full-Stack Car Rental Platform <i>Next.js, Tailwind CSS, HeroUI, Framer Motion, MongoDB, Node.js, Express.js, JWT, Better Auth</i>	Live Link	Client	Server
- Built and deployed a full-stack car rental platform enabling users to browse car listings, search and filter by name/type, view detailed car information, and book vehicles. - Implemented secure authentication using Better Auth with Google OAuth and email/password login, integrated with MongoDB and JWT stored in HTTP-only cookies. - Developed reusable React components and responsive user interfaces using Next.js App Router, Tailwind CSS, HeroUI, and Framer Motion animations. - Enabled car owners to perform full CRUD operations on their listings — add, edit, update, and delete — with separate dashboards for managing added cars and viewing booking history.			

- Deployed the application on Vercel with CI/CD integration, implemented protected routes, search/filter functionality using MongoDB \$regex, and booking count increment with \$inc.

Doctor Appointment System | ASP.NET Core MVC, C#, SQL Server, Entity Framework Core, Bootstrap

GitHub

- Developed a multi-role healthcare management system for Patients, Doctors, and Administrators using ASP.NET Core MVC architecture.
- Implemented appointment booking, schedule management, patient records, and role-based dashboards with secure authorization controls.
- Built cookie-based authentication and authorization using ClaimsIdentity and Cookie Authentication to ensure secure user access.
- Integrated SQL Server and Entity Framework Core for efficient data management, appointment tracking, and user profile operations.

Game Mart Management System | C#, WinForms, MySQL

GitHub

- Built a desktop application to manage store inventory, product records, and sales information.
- Implemented CRUD operations and database connectivity using MySQL.
- Designed modules for stock tracking and sales management.

EXTRACURRICULAR ACTIVITIES

General Member

Engineering Students Association of Bangladesh (ESAB) – AIUB UNIT FACE

LANGUAGES

English: Fluent
Reading, Writing, Speaking

Bangla: Native
Mother Tongue
